DATE MAILED: 08/27/2002

Notice of Possible Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there may be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of any fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

REASON FOR ALLOWANCE***EXAMINER'S AMENDMENT***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with J. Harold Nissen on 8/14/2002.

The application has been amended as follows:

Regarding claim 4, please add this prior to line 7 page 3 of the after final amendment:

a first sub-step for requesting a telephone of the calling subscriber to the HLR, transmitting a telephone number and extension number to the SCP with respect to the calling subscriber, requesting a MDN information of the receiving subscriber, and judging whether there is a group of the telephone number of the calling subscriber;

Therefore, the whole claim should read as follows:

1. A method for constructing a WVPN (Wireless Virtual Private Network) for a CDMA system which includes a mobile telephone serviced by a private network group, a BTS (Base Transceiver System) for transmitting and receiving a message with the mobile telephone, a BSC (Base Station Controller) for managing the BTS, a MSC (Mobile Switching Center) including a MSA (Mobile Signaling Access), a MCC (Mobile

Call Control), and a VLR (Visitor Location Register), a HLR (Home Location Register), and a SCP (Service Control Point) for storing an extension number with respect to a calling subscriber serviced by a private network group, a method for constructing a WVPN for a CDMA system comprising the steps of:

1) a first step for registering a private network group and extension number to the SCP and judging whether a call by a certain calling subscriber corresponds to an extension number or a MDN (Mobile Directory Number) when a certain calling subscriber calls a certain receiving subscriber of the same group as the calling subscriber;

a second step for constructing a mobile communication network using the MDN in the case that as a result of the first step the call by the calling subscriber corresponds to the MDN and constructing a WVPN in the case that the call by the calling subscriber corresponds to the extension number;

a first sub-step for requesting a telephone of the calling subscriber to the HLR, transmitting a telephone number and extension number to the SCP with respect to the calling subscriber, requesting a MDN information of the receiving subscriber, and judging whether there is a group of the telephone number of the calling subscriber;

a judgement sub-step for judging whether the extension number transmitted to the SCP exists in the group of the calling subscriber in the case that when there is the group of the telephone number of the calling subscriber as a result of the judgement of the first sub-step;

DI and including a sub-step for transmitting a non-available call connection guide message to the calling subscriber in the case that the extension number does not exist in a group of the telephone number of the calling subscriber as a result of a judgement as to whether there is a group of the telephone number of the calling subscriber based on a judgement whether an extension number transmitted to the SCP exists and in the case that the extension number exists in the group of the calling subscriber as a result of a judgement of the judgement sub-step.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Regarding claim 4, the cited prior art, Widergen discloses a method for constructing a WVPN (Wireless Virtual Private Network) for a CDMA system which includes a mobile telephone 122 serviced by a private network group PTN 108, a BTS (Base Transceiver System) in 114 for transmitting and receiving a message with the mobile telephone, a BSC(Base Station Controller) in 114 for managing the BTS, a MSC 112 (Mobile Switching Center) including a MSA (Mobile Signaling access), a MCC (Mobile Call Control) inherently therein, and a VLR (Visitor Location Register) (col 4, lines 67), a HLR (Home Location Register) 110, a SCP (Services Control Point) 110 for storing an extension number with respect to a calling subscriber serviced by a private network group, a method for constructing a WVPN for a CDMA system comprising the steps of:

a first step for registering a private corporate group and short (extension) number to the SCP database 110 (col 4, lines 44-57); and judging whether a call by a certain calling subscriber's terminal CMT corresponds to a PN (personal short extension number) or a regular mobile directory number when a certain calling subscriber 120 calls a certain receiving subscriber 122 of the same corporate group as the calling subscriber in the private wireless office system 142 (col 4, lines 44-60);

a second step for constructing a WVPN (in which the WO Gateway 124 in the private wireless office 142 emulate a PBX/PTN node) in the case that the call by the calling subscriber 120 corresponds to the private extension number PN (col 5, lines 60-66; col 7, lines 55 - col 8, line 20) wherein the second step includes:

a first sub-step for requesting a telephone of the calling subscriber to the HLR/SCP 110, transmitting a telephone number and extension number to the SCP with respect to the calling subscriber (col 6, lines 23-33), requesting a PN information of the receiving subscriber (col 5, lines 60-65), and judging whether there is a corporate group of the telephone number of the calling subscriber (col 5, lines 65-67);

a judgement sub-step for judging whether the extension number transmitted to the SCP exists in the corporate group of the calling subscriber in the case that when there is the group of the telephone number of the calling subscriber as a result of the judgement of the first sub-step (col 8, lines 1-20);

However, the cited prior art fails to disclose further:

including a sub-step for transmitting a non-available call connection guide message to the calling subscriber in the case that the extension number does not exist

in a group of the telephone number of the calling subscriber as a result of a judgement as to whether there is a group of the telephone number of the calling subscriber based on a judgement whether an extension number transmitted to the SCP exists and in the case that the extension number exists in the group of the calling subscriber as a result of a judgement of the judgement sub-step.

Regarding claim 5, the cited prior art, Widergen discloses a method for constructing a WVPN (Wireless Virtual Private Network) for a CDMA system which includes a mobile telephone 122 serviced by a private network group PTN 108, a BTS (Base Transceiver System) in 114 for transmitting and receiving a message with the mobile telephone, a BSC(Base Station Controller) in 114 for managing the BTS, a MSC 112 (Mobile Switching Center) including a MSA (Mobile Signaling access), a MCC (Mobile Call Control) inherently therein, and a VLR (Visitor Location Register) (col 4, lines 67), a HLR (Home Location Register) 110, a SCP (Services Control Point) 110 for storing an extension number with respect to a calling subscriber serviced by a private network group, a method for constructing a WVPN for a CDMA system comprising the steps of:

a first step for registering a private corporate group and short (extension) number to the SCP database 110 (col 4, lines 44-57); and judging whether a call by a certain calling subscriber's terminal CMT corresponds to a PN (personal short extension number) or a regular mobile directory number when a certain calling subscriber 120 calls a certain receiving subscriber 122 of the same corporate group as the calling subscriber in the private wireless office system 142 (col 4, lines 44-60);

a second step for constructing a WVPN (in which the WO Gateway 124 in the private wireless office 142 emulate a PBX/PTN node) in the case that the call by the calling subscriber 120 corresponds to the private extension number PN (col 5, lines 60-66; col 7, lines 55 - col 8, line 20) wherein the second step includes:

a first sub-step for requesting a telephone of the calling subscriber to the HLR/SCP 110, transmitting a telephone number and extension number to the SCP with respect to the calling subscriber (col 6, lines 23-33), requesting a PN information of the receiving subscriber (col 5, lines 60-65), and judging whether there is a corporate group of the telephone number of the calling subscriber (col 5, lines 65-67);

a second sub-step for judging whether the extension number transmitted to the SCP exists in the corporate group of the calling subscriber in the case that when there is the group of the telephone number of the calling subscriber as a result of the judgement of the first sub-step (col 8, lines 1-20);

a third sub-step for constructing the WVPN by transmitting the MDN corresponding to the receiving extension number to the MSC in the case that the extension number exists in the group of the calling subscriber as a result of the judgement of the second sub-step (col 8, lines 1-20; col 6, lines 30-33).

However, the cited prior art fails to disclose further a fourth sub-step for transmitting a non-available call connection guide message to the calling subscriber in the case that there is not a group of the telephone number of the calling subscriber as a result of the judgement of the first sub-step and in the case that the extension number

does not exist in the group of the calling subscriber as a result of the judgement of the second sub-step.

Regarding claim 6, the cited prior art, Widergen discloses a method for constructing a WVPN (Wireless Virtual Private Network) for a CDMA system which includes a mobile telephone 122 serviced by a private network group PTN 108, a BTS (Base Transceiver System) in 114 for transmitting and receiving a message with the mobile telephone, a BSC(Base Station Controller) in 114 for managing the BTS, a MSC 112 (Mobile Switching Center) including a MSA (Mobile Signaling access), a MCC (Mobile Call Control) inherently therein, and a VLR (Visitor Location Register) (col 4, lines 67), a HLR (Home Location Register) 110, and a SCP (Services Control Point) 110 comprising the steps of:

a first step for registering a private corporate group and short (extension) number to the SCP database 110 (col 4, lines 44-57); and judging whether a call by a certain calling subscriber's terminal CMT corresponds to a PN (personal short extension number) or a regular mobile directory number when a certain calling subscriber 120 calls a certain receiving subscriber 122 of the same corporate group as the calling subscriber in the private wireless office system 142 (col 4, lines 44-60);

a second step for constructing a WVPN (in which the WO Gateway 124 in the private wireless office 142 emulate a PBX/PTN node) in the case that the call by the calling subscriber 120 corresponds to the private extension number PN (col 5, lines 60-66; col 7, lines 55 - col 8, line 20) wherein the second step includes:

a first sub-step for requesting a telephone of the calling subscriber to the HLR/SCP 110, transmitting a telephone number and extension number to the SCP with respect to the calling subscriber (col 6, lines 23-33), requesting a PN information of the receiving subscriber (col 5, lines 60-65), and judging whether there is a corporate group of the telephone number of the calling subscriber (col 5, lines 65-67);

a second sub-step for judging whether the extension number transmitted to the SCP exists in the corporate group of the calling subscriber in the case that when there is the group of the telephone number of the calling subscriber as a result of the judgement of the first sub-step (col 8, lines 1-20);

a third sub-step for constructing the WVPN by transmitting the MDN corresponding to the receiving extension number to the MSC in the case that the extension number exists in the group of the calling subscriber as a result of the judgement of the second sub-step (col 8, lines 1-20; col 6, lines 30-33).

However, the cited prior art fails to disclose further a fourth sub-step for transmitting a non-available call connection guide message to the calling subscriber in the case that there is not a group of the telephone number of the calling subscriber as a result of the judgement of the first sub-step and in the case that the extension number does not exist in the group of the calling subscriber as a result of the judgement of the second sub-step and in the case that the extension number exists in the group of the calling subscriber as a result of the judgement of the second sub-step.
